Full-stack developer building production web applications and AI-powered developer tools with JavaScript, TypeScript, React, Next.js, Node.js, and PostgreSQL. Experienced in translating client requirements into live business systems, integrating generative AI APIs, and developing citation, assessment, and interview-evaluation workflows.

EXPERIENCE

Freelance Full-Stack Developer

MedSathi Pharmacy · Live Production Application

- Built and deployed a full-stack pharmacy management system supporting real-world business operations.
- Developed billing, inventory tracking, and automated reporting workflows.
- Gathered client requirements and improved system usability through iterative product updates.

Node.js Development Intern

Nov 2024 - Jan 2025

WebGuru Infosystems

- Completed a three-month internship focused on Node.js and MongoDB development.

PROJECTS

Studium — AI Academic Copilot and Assessment Engine

- Developed a study platform combining synchronized PDF textbook reading with interactive YouTube video transcripts.
- Built an AI tutor using Google Gemini to answer questions with page-level citations and generate interactive exam quizzes.

LeadPilot — AI Lead Generation and Outreach Agent

- Built an AI-powered lead-generation and outreach workflow using n8n, Google Places, Gemini, Firecrawl, and PostgreSQL to discover businesses, research companies, and generate personalized outreach emails.
- Automated company research, contact-email discovery, AI-driven lead analysis, and personalized email generation, storing persistent lead intelligence in PostgreSQL.
- Integrated Gmail API and human-in-the-loop approval to review, edit, approve, and send outreach emails, with state-based safeguards against unapproved or duplicate sends.

TeamFlow — Real-Time Collaboration Platform

- Built a full-stack collaboration platform with workspaces, channels, direct messages, threads, mentions, notifications, reactions, and file sharing.
- Implemented Socket.IO real-time messaging, presence, typing indicators, and cross-client synchronization with secure role-based access control.
- Engineered REST and real-time state reconciliation with reconnect recovery, race-condition handling, and PostgreSQL/Prisma APIs.

EDUCATION

Master of Computer Application

2023 - 2025

Brainware University · GPA: 8.42/10

Bachelor of Computer Application

2020 - 2023

Brainware University · GPA: 9.11/10

TECHNICAL SKILLS

JavaScript

TypeScript

React.js

Next.js

Node.js

Express.js

REST APIs
